

# **Streamlining Ticket Assignment for Efficient Support Operations**

**Team Id : NM2025TMID13986**

**Team Members:**

<b>Team Leader</b>	<b>:</b>	<b>J Saiprakash</b>
<b>Team Member 1</b>	<b>:</b>	<b>M Yogesh</b>
<b>Team Member 2</b>	<b>:</b>	<b>K Jude Samuel</b>
<b>Team Member 3</b>	<b>:</b>	<b>V Kamalesan</b>

## **Problem Statement:**

ABC Corporation currently experiences delays in resolving support tickets due to manual assignment processes. Tickets are often routed incorrectly or take longer to reach the appropriate teams, leading to inefficient use of resources and reduced customer satisfaction. This creates a need for an automated system that can assign tickets accurately and efficiently.

## **Objective:**

The objective of this initiative is to implement an automated system for ticket routing at ABC Corporation, aimed at improving operational efficiency by accurately assigning support tickets to the appropriate teams. This solution aims to reduce delays in issue resolution, enhance customer satisfaction, and optimize resource utilization within the support department.

## **Skills:**

Tensorflow, Spring

# TASK INITIATION

## Milestone 1 : Users

### Activity 1: Create Users

#### Steps:

- 1) Open **ServiceNow** and log in.
- 2) Navigate to **All** → **System Security** → **Users**.
- 3) Click **New** to create a user.
- 4) Fill in the required details for the first user.
- 5) Click **Submit** to save the user account.
- 6) Repeat steps 3–5 to create a second user with the specified details

Using the steps above, two users were successfully created:  
**Manne Niranjan** and **Katherine pierce**.

This screenshot shows the 'New record' form for a user in ServiceNow. The form is titled 'User New record' and includes a navigation bar with a back arrow, a menu icon, and a 'Sub' button. A blue banner at the top contains the instruction: 'To set up the User's password, save the record and then click Set Password.' The form is divided into two main sections. The left section contains fields for 'User ID' (manne.niranjan), 'First name' (Manne), 'Last name' (Niranjan), 'Title' (empty), and 'Department' (empty with a search icon). Below these are checkboxes for 'Password needs reset', 'Locked out', 'Active' (checked), 'Web service access only', and 'Internal Integration User'. The right section contains fields for 'Email' (niranjanreddymanne2507@gmail.com), 'Language' (None), 'Calendar integration' (Outlook), 'Time zone' (System (America/Los\_Angeles)), 'Date format' (System (yyyy-MM-dd)), 'Business phone', and 'Mobile phone'. A 'Photo' field with a 'Click to add...' link is also present.

This screenshot shows the 'New record' form for a user in ServiceNow, similar to the one above but for a different user. The form is titled 'User New record' and includes a navigation bar with a back arrow, a menu icon, and a 'Submit' button. A blue banner at the top contains the instruction: 'To set up the User's password, save the record and then click Set Password.' The form is divided into two main sections. The left section contains fields for 'User ID' (katherine.pierce), 'First name' (Katherine), 'Last name' (Pierce), 'Title' (empty), and 'Department' (empty with a search icon). Below these are checkboxes for 'Password needs reset', 'Locked out', 'Active' (checked), 'Web service access only', and 'Internal Integration User'. The right section contains fields for 'Email' (empty), 'Language' (None), 'Calendar integration' (Outlook), 'Time zone' (System (America/Los\_Angeles)), 'Date format' (System (yyyy-MM-dd)), 'Business phone', and 'Mobile phone'. A 'Photo' field with a 'Click to add...' link is also present.

## Milestone 2 : Groups

### Activity 1: Create Groups

#### Steps:

- 1) Open **ServiceNow** and log in.
- 2) Navigate to **All** → **System Security** → **Groups**.
- 3) Click **New** to create a group.
- 4) Fill in the required details for the first group.
- 5) Click **Submit** to save the group.
- 6) Repeat steps 3–5 to create a second group with the specified details.

Using the steps above, two groups were successfully created:  
**platform** and **Certificates**

< ≡ Group

Name certificates Group email

Manager Katherine Pierce Parent

Description

Submit

< ≡ Group  
New record

Name Platform Group email

Manager Manne Niranjan Parent

Description

Submit

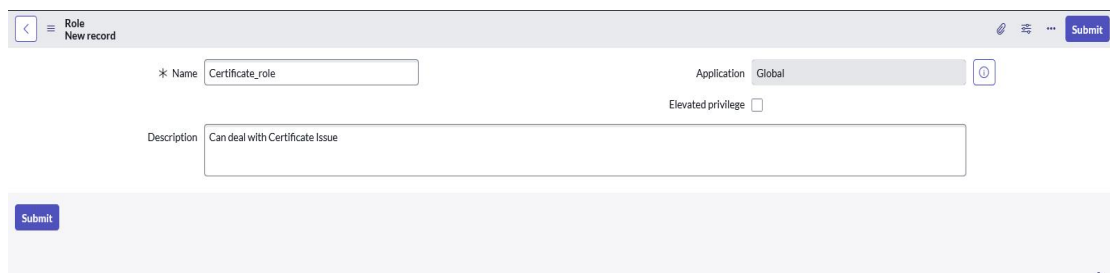

## Milestone 3 : Roles

### Activity 1: Create Roles

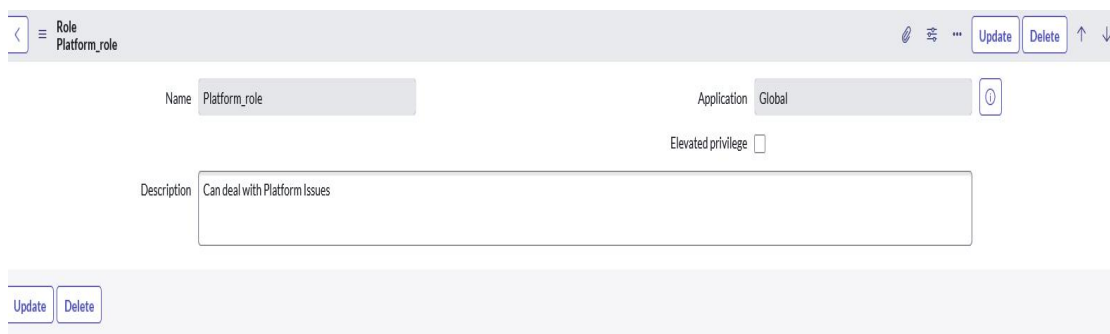

#### Steps:

- 1) Open **ServiceNow** and log in.
- 2) Navigate to **All** → **System Security** → **Roles**.
- 3) Click **New** to create a role.
- 4) Fill in the required details for the first role.
- 5) Click **Submit** to save the role.
- 6) Repeat steps 3–5 to create a second role with the specified details.

Using the steps above, two roles were successfully created:  
**Certificate\_role** and **Platform\_Role**.

This screenshot shows the 'New record' form for creating a role in ServiceNow. The form is titled 'Role' and 'New record'. It includes a 'Name' field with the value 'Certificate\_role', an 'Application' dropdown set to 'Global', and an 'Elevated privilege' checkbox which is unchecked. The 'Description' field contains the text 'Can deal with Certificate Issue'. A 'Submit' button is located at the bottom left of the form.

This screenshot shows the 'Platform\_role' form in ServiceNow. The form is titled 'Role' and 'Platform\_role'. It includes a 'Name' field with the value 'Platform\_role', an 'Application' dropdown set to 'Global', and an 'Elevated privilege' checkbox which is unchecked. The 'Description' field contains the text 'Can deal with Platform Issues'. At the bottom left, there are 'Update' and 'Delete' buttons.

## Milestone 4 : Table

### Activity 1: Create Table

#### Steps:

- 1) Open **ServiceNow** and log in.
- 2) Navigate to **All** → **System Definition** → **Tables**.
- 3) Click **New** to create a table.
- 4) Fill in the following details:
  - a) **Label:** Operations related
  - b) Check the boxes **Create module** and **Create mobile module**
  - c) **New menu name:** Operations related

The screenshot shows the 'New record' form for creating a table in ServiceNow. The form is titled 'Table New record View: Tables'. It includes a description: 'A table is a collection of records in the database. Each record corresponds to a row in a table, and each field on a record corresponds to a column on that table. Applications use tables and records to manage data and processes. [More Info](#)'. The form contains the following fields:

- \* Label: Operations related
- \* Name: u\_st\_operations\_related
- Application: Global
- Remote Table: ☒
- Create module: ☒
- Create mobile module: ☒
- Add module to menu: -- Create new --
- New menu name: Operations related

#### 5) Under table columns give the columns

The screenshot shows the 'Table Columns' form in ServiceNow. The form is titled 'Table Columns for text Search'. It includes a search bar and a 'New' button. The table below lists the columns for the 'u\_st\_operations\_related' table.

Column label	Type	Reference	Max length	Default value	Display
Created	Date/Time	(empty)	40	false	
Ticket Raised Date	Date/Time	(empty)	40	false	
Updated	Date/Time	(empty)	40	false	
Assigned by user	Reference	User	32	false	
Name	String	(empty)	40	false	
Priority	String	(empty)	40	false	
Comment	String	(empty)	40	false	
Updates	Integer	(empty)	40	false	
Issue	Choice	(empty)	40	false	
Sys ID	Sys ID (GUID)	(empty)	32	false	
Assigned by Group	Reference	Group	32	false	
Service Request No	String	(empty)	40	false	
Updated By	String	(empty)	40	false	
Created By	String	(empty)	40	false	
Insert a new row...					

#### 6) Click **Submit** to save the table.

7) Create choices for the issue filed by using form design

Choices are

- unable to login to platform
- 404 error
- regarding certificates
- regarding user expired

<div>+</div>	Insert a new row...					

## Milestone 5 : Assign roles & users to groups

### Activity 1: Assign roles & users to certificate group

#### Steps:

- 1) Open **ServiceNow** and log in.
- 2) Go to **All** → **User Administration** → **Groups**.
- 3) Search and open the **Certificates** group.
- 4) In the **Group Members** related list, click **Edit**, add **Katherine Pierce**, and **Save**.

Group = certificates

☐

Katherine Pierce

1 to 1 of 1

- 5) In the **Roles** related list (still on the group form), click **Edit**, add **Certification\_role**, and **Save**

Group = certificates

Name: certificates Group email:

Manager: Katherine Pierce Parent:

Description:

Update Delete

Roles (1) Group Members (1) Groups

Created Search Actions on selected rows... Edit...

Created	Role	Granted by	Inherits
2025-09-08 03:49:13	Certificate_role	(empty)	true

1 to 1 of 1

## Activity 2: Assign roles & users to platform group

### Steps:

- 1) Open **ServiceNow** and log in.
- 2) Go to **All** → **User Administration** → **Groups**.
- 3) Search and open the **Platform** group.
- 4) In the **Group Members** related list, click **Edit**, add **Manne Niranjan**, and **Save**.

The screenshot shows the 'Group Members' tab for the 'Platform' group. At the top, there are 'Update' and 'Delete' buttons. Below the tabs, there is a search bar with a dropdown menu set to 'User' and a search input field. The search results show a single entry for 'Manne Niranjan' with a checkbox and a magnifying glass icon to its left.

- 5) In the **Roles** related list (still on the group form), click **Edit**, add **Certification\_role**, and **Save**

The screenshot shows the 'Roles' tab for the 'Platform' group. It displays a table with the following data:

Created	Role	Granted by	Inherits
2025-09-08 03:56:54	Platform_role	(empty)	true

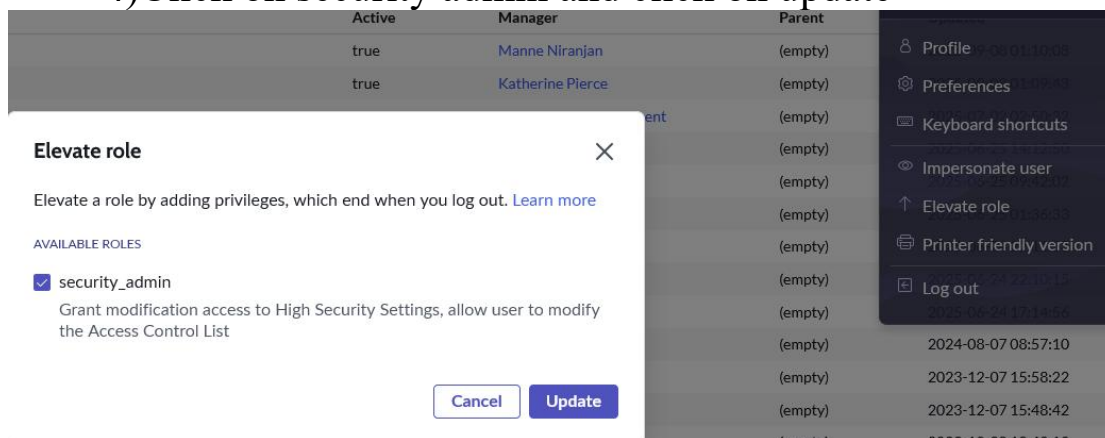

At the bottom of the table, there is a pagination control showing '1 to 1 of 1'.

## Milestone 6 : Assign role to table

### Activity 1 : Assign role to table

Steps:

- 1)Open service now.
- 2)Click on the profile on top right side
- 3)Click on elevate role
- 4)Click on security admin and click on update

- 5)Click on All >> search for ACL
- 6)Select on **u\_operations\_related read**
- 7)Under Requires role
- 8)Double click on insert a new row
- 9)Give platform role
- 10)And add certificate role
- 11)Click on update

- 12) Select on **u\_operations\_related write**
- 13) Under Requires role
- 14) Double click on insert a new row
- 15) Give platform role
- 16) And add certificate role
- 17) Click on update

Requires role	
Role	
	u_operations_related_user
 	Platform_role
 	Certificate_role
	Insert a new row...

## Milestone 7 : Create ACL

### Activity 1 : Create ACL

#### Steps:

- 1)Open service now.
- 2)Click on All >> search for ACL
- 3)Select Access Control(ACL) under system security
- 4)Click on new
- 5)create a new ACL by following details

Access Control  
New record

Warning: A role, security attribute, data condition, script or ACL control via reference fields is required to properly secure access with this ACL.

\* Type: record (0)  
\* Operation: write (0)  
Decision Type: Allow If  
Application: Global (0)  
Active: ☒  
Advanced: ☐  
Admin overrides: ☒  
Protection policy: -- None --  
\* Name: Operations related [u\_st\_operations\_related] Priority:   
Description:   
Applies To: No. of records matching the condition: 0  
Add Filter Condition Add OR Clause  
-- choose field -- -- oper -- -- value --

- 6)Scroll down under requires role
- 7)Double click on insert a new row
- 8)Give admin role

Requires role

Role	
<input checked="" type="checkbox"/>	admin

+ Insert a new row...

Security Attribute Condition

- 9)Click on submit

10)Similarly create 4 acl for the following fields

<div><div></div><div></div></div> <div>Name</div>	Decision Type	Operation	Type	Active	Updated by	Updated ▾
<a href="#">u_st_operations_related.u_service_reques...</a>	Allow If	<a href="#">write</a>	<a href="#">record</a>	true	admin	2025-09-08 04:42:29
<a href="#">u_st_operations_related.u_name</a>	Allow If	<a href="#">write</a>	<a href="#">record</a>	true	admin	2025-09-08 04:41:18
<a href="#">u_st_operations_related.u_issue</a>	Allow If	<a href="#">write</a>	<a href="#">record</a>	true	admin	2025-09-08 04:40:31
<a href="#">u_st_operations_related.u_ticket_raised_...</a>	Allow If	<a href="#">write</a>	<a href="#">record</a>	true	admin	2025-09-08 04:39:31
<a href="#">u_st_operations_related.u_priority</a>	Allow If	<a href="#">write</a>	<a href="#">record</a>	true	admin	2025-09-08 04:38:38

## Milestone 7 : Flow

### Activity 1 : Create a Flow to Assign operations ticket to Certificate group

#### Steps:

- 1)Open service now.
- 2)Click on All >> search for Flow Designer
- 3)Click on Flow Designer under Process Automation.
- 4)After opening Flow Designer Click on new and select Flow.
- 5)Under Flow properties Give Flow Name as “ Regarding Certificate”.
- 6)should be Global.
- 7)Select Run user as “ System user ” from that choice.
- 8)Click on Submit.

#### Let's get the details for your flow

- 14) Now under Actions.
- 15) Click on Add an action.
- 16) Select action in that search for “ Update Record ”.
- 17) In Record field drag the fields from the data navigation from left side
- 18) Table will be auto assigned after that
- 19) Give the field as “ Assigned to group ”
- 20) Give value as “ Certificates ”

- 21) Click on Done.
- 22) Click on Save to save the Flow.
- 23) Click on Activate.

## Activity 1 : Create a Flow to Assign operations ticket to Platform group

### Steps:

- 1)Open service now.
- 2)Click on All >> search for Flow Designer
- 3)Click on Flow Designer under Process Automation.
- 4)After opening Flow Designer Click on new and select Flow.
- 5)Under Flow properties Give Flow Name as “ Regarding Platform”.
- 6)should be Global.
- 7)Select Run user as “ System user ” from that choice.
- 8)Click on Submit.

### Let's get the details for your flow

9)Click on Add a trigger

10)Select the trigger in that Search for “create or update a record” and select that.

11)Give the table name as “ Operations related ”.

12)Give the Condition as

Field : issue

Operator : is

Value : Unable to login to platform

Click on New Criteria

Field : issue

Operator : is

Value : 404 Error

Click on New Criteria

Field : issue

Operator : is

Value : Regrading User expired

13)After that click on Done.

The screenshot shows a configuration window for a trigger named "Operations related". The trigger is set to "Created or Updated" and is associated with the table "Operations related [u\_st\_operati...]". The condition is configured as three separate criteria, each with the field "Issue" and the operator "is". The first criterion has the value "unable to login to platform", the second has "404 error", and the third has "regarding user expired". The criteria are connected by "OR" operators. The trigger is set to run "For every update". At the bottom, there are buttons for "Delete", "Cancel", and "Done", along with an "Advanced Options" dropdown.

Operations related Created or Updated where (Issue is unable to login to platform; Issue is 404 error; Issue is regarding user expired)

Trigger: Created or Updated

\* Table: Operations related [u\_st\_operati... X

Condition: All of these conditions must be met

or

All of these conditions must be met

Issue is 404 error OR AND

or

All of these conditions must be met

Issue is regarding user expired OR AND

or

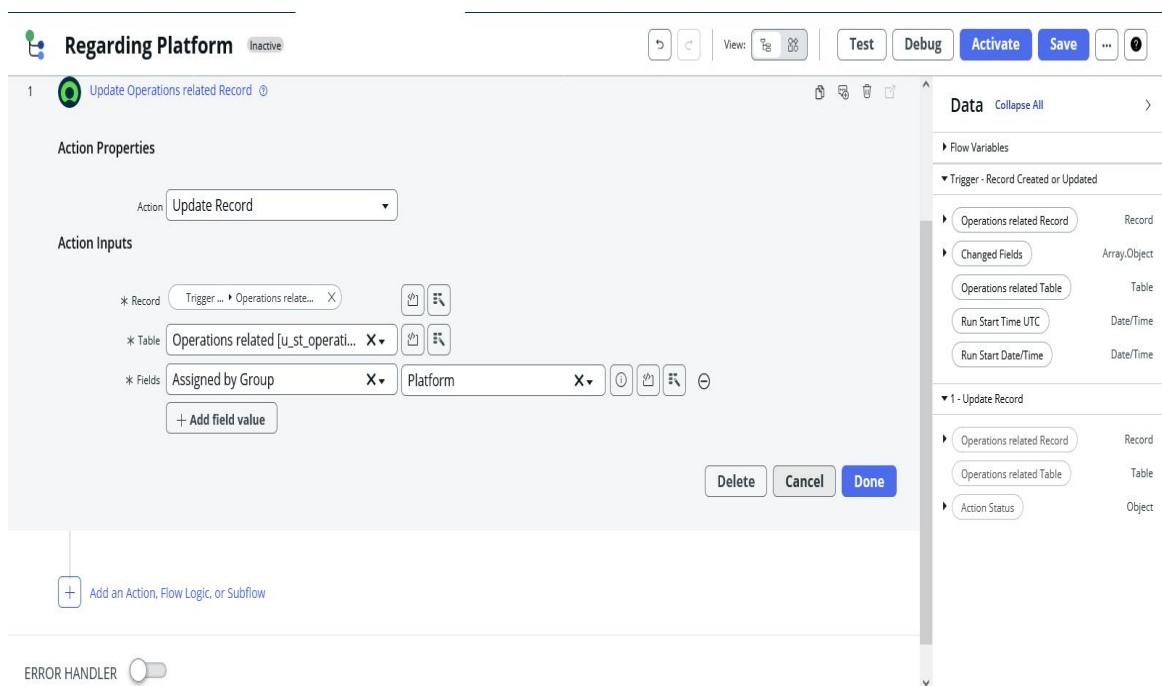

New Criteria

Run Trigger: For every update

Advanced Options

Delete Cancel Done

- 14) Now under Actions.
- 15) Click on Add an action.
- 16) Select action in that search for “ Update Record ”.
- 17) In Record field drag the fields from the data navigation from left side
- 18) Table will be auto assigned after that
- 19) Give the field as “ Assigned to group ”.
- 20) Give value as “ Platform ”.
- 21) Click on Done.
- 22) Click on Save to save the Flow.
- 23) Click on Activate.

## **Conclusion:**

This document outlined the end-to-end process of streamlining ticket assignment in ServiceNow for ABC Corporation. The steps covered include creating users, groups, and roles; designing a custom operations table; applying access controls; and building flows for automated ticket routing.

By following these milestones, an automated ticket assignment framework was successfully implemented. This solution eliminates manual routing, ensures tickets are directed to the correct support groups, and reduces delays in issue resolution.

## **Key Outcomes:**

Two user accounts and two groups were created to represent support teams.

Roles were defined and assigned to manage access rights.

A custom operations table was created with relevant issue categories.

ACLs were configured to enforce role-based security.

Automated flows were built to assign tickets to the correct groups based on issue type.
